

PMI INDUSTRIES, INC.

PMI Industries, Inc. designs, manufactures and tests innovative products for solving underwater cable, wire rope and tension member application problems that withstand even the harshest underwater conditions.

Backed by more than 40 years of quality and service, PMI has been serving customers in the marine seismic industry with a full line of high performing products that are designed to protect multi-million dollar cable investments and minimize downtime.

PMI is committed to providing the most robust cable systems and hardware available to the military, commercial and scientific communities.

From initial product concept through quality assurance testing, PMI is a complete underwater cable system facility offering solutions for all types of applications in the marine industry including: Cable Installation, Defense & Surveillance, Monitoring & Fisheries, ROVs & Ocean Equipment, Salvage, Search & Recovery Operations, Seismic & Survey Exploration and more.

The Tech

The gripping principles of PMI's products are based upon the geometry and behavior of helically preformed wire. Through innovation and exhaustive laboratory testing, this unique helical gripping concept was engineered into

many of PMI's products, resulting in a very reliable standard line of products, including:

The DYNA-HANGER Suspension System (DHSS), which is a highly-reliable, cable-mounted attachment point for seismic streamers, paravanes, surface and subsurface floats, cable depressors and wherever a mid-span termination is required. It is an engineered system that has been laboratory tested and field proven by PMI Industries.

The EVERGRIP Termination is a full-strength, field installable termination. Designed to hold 100 percent of the cable's rated breaking strength, it protects against fatigue of the cable system under severe dynamic conditions.

The STOPPER/CABLE GRIP Terminations are ideal for getting a quick grip on your cable. The reliable, unique helical grip design offers both standard and custom options to fit most wire rope and E/M cables.
