

DYNA II™ MINI, DYNA II™ LITE, UMBILICAL DYNA II™

DYNA-HANGER® System Options for Specialty Applications

PRODUCT DESCRIPTION

PMI's DYNA-HANGER family of products are specialized to meet the requests and application requirements of our customers. All designs allow for ease of installation anywhere along the cable, offering many attachment possibilities.

DYNA II MINI

The DYNA II Mini is a smaller version of the DYNA II to handle in-line loads up to 20 tonnes. Pad-eye configuration can be adjusted to meet needs. 3 tonnes and 6 tonnes standard option. The DYNA II Mini allows for independent height adjustment of the streamers.

DYNA II LITE

The DYNA II Lite is designed for applications with up to 20 tonnes in-line loads and 25 tonnes side loads as needed. This results in substantial weight savings in towing the cable array.

DYNA II UMBILICAL

The DYNA II Umbilical is specialized for gun umbilical applications. Multiple pad-eye options for umbilical float attachments, which fit a range of cable diameters.

FEATURES AND BENEFITS:

- Same high quality, installation technique as DYNA II systems to save installation time.
- Re-usable hardware and retermination kit availability offers significant cost-savings.
- Cable suspension below surface/off seafloor
